Andy,

We fully support the 2006-08' STIP plan. We do need a nearer completion date of construction for the Angoon Terminal upgrade project. For a proposed phase project please refer to the following:

- 1.) EIS and Army Corp of Engineer process
- 2.) Ferry Terminal Building with proper water, sewer and lights. The City of Angoon will have to relinquish portions of the tideland to construct the waiting room. We are working with Inside Passage Electrical Coop (IPEC) and Chatham Electric, Inc. to install a power line to the proposed site of the new waiting room.
- 3.) Tide Lands to reconfigure the mooring and transfer facility. I am working on portions of this, as the City of Angoon may have to relinquish portions of the lease.
- 4.) Mooring and transfer facility.

Thank you for the opportunity.

Walter Jack, Mayor
